

# iPill Box

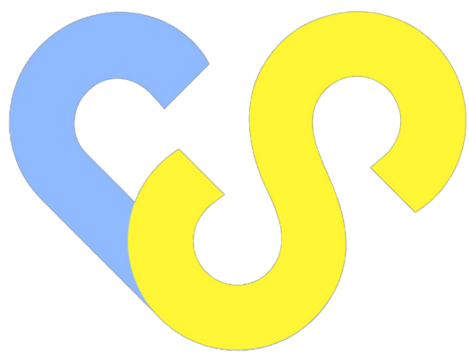

patent BIT28042

It fully responds to the recommendations number 7 and 12 of the Ministry of Health about errors during pharmacological therapy and for the medicines look alike/sound alike

At least 2 weekly dispenser with NFC tag are given to each person to easily recognise the patient and their therapy.

The use of the NFC Tag guarantee the administration of the RIGHT DOSE to the RIGHT PATIENT at the RIGHT TIME, following the 7G REGULATION .

On CentroStella, Organized Structures for Home Care can organize the dispenser according to the therapy previously uploaded on the person's profile, and set the iPill Box with the RIGHT THERAPY, the RIGHT DOSE at the RIGHT TIME for the administration of the medicines.

At the time set, the iPILL BOX will start to rotate, opening at the place of the RIGHT THERAPY. An App will be given to the assisted through which, at the time set for taking the medicine, a VOCAL ALARM will activate as a reminder to take the medicine.

To confirm the taking of the therapy, the assisted will have to tap the red button of the given App. In case of missed confirmation, CentroStella will send an alarm notification.
