

iSensor
patent BIT26052

Wearable device that allows to
detect FALL, SHAKING, BODY
TEMPERATURE and POSITION.

In a context in which fall is one of the main causes of
accidental death and the mistreatments and brawls in
Residential Facilities are real problems for the Health
System, iSensor is our answer.

With iSensor is possible the activation of:

IMMEDIATE ALARMS

Fall

Shaking

DELAYED ALARMS

Body
temperature

Position

This is possible thanks to the installation of iGate, anchors that allows the mapping of a given area.

The alarms will be visible in real time on CentroStella and on the app given to the operators.
